### **RES Response to SEM-09-107 Preferred Options to be considered for the Implementation of Locational Signals on the Island of Ireland**

RES is a leading renewable energy company with businesses in Europe, North America and Australia. RES has been at the forefront of wind energy development since the 1970s and is the leading independent developer in the UK. We built our first wind farm in Cornwall in 1992 and since then have completed more than 4,500MW of wind energy capacity worldwide, including projects in the UK, Ireland, France, Scandinavia, and across the United States. The RES Group has a large portfolio of projects at various stages of development and construction (both onshore and offshore) in the UK, the rest of Europe, North America and Asia Pacific.

We are pleased to have the opportunity to respond to this important consultation and wish to place on record our support for the response provided to you by the Irish Wind Energy Association.

Yours sincerely,

Richard Ford  
UK Grid Connections Manager
