**8<sup>th</sup> August 2008**

## Information Note

Following the consultation 'Transmission Use of System Charging: Methodology for All-Island Generation Tariffs, June 2008' the Regulatory Authorities (RAs) have decided not to proceed with the harmonisation of generator TUoS charges for the year 2008/09. This is as a result of the volume and nature of the concerns raised by market participants in response to the June consultation and of residual uncertainties over the impact, appropriateness and robustness of certain aspects of the methodology.

Accordingly, the existing jurisdictional generator tariff regimes will apply for the tariff period 1st October 2008 to 30th September 2009. Taking account of comments received to the recent consultation, the RAs are examining the options for the subsequent tariff period and will shortly publish a separate note on the AIP website.
