

All island Transmission Use of System Charging and Loss Factor Participant Questionnaire

In the January 2009 response paper SEM-09-001 covering All-Island Transmission Use of System Charging & Loss Factors, the Regulatory Authorities announced that the Transmission System Operators would commence a review of the options and methodologies for deriving harmonised all-island locational charges. As part of this review, the System Operators have prepared this questionnaire in order to ascertain more information from participant regarding their positions with regard to locational regimes for All-island Transmission Use of System Charges and Loss Factors.

The questionnaire is split into three separate sections

1. Generator Transmission Use of System Tariffs (GTUoS)
2. Demand/ Supplier Transmission Use of System Tariffs (STUoS)
3. Transmission Loss Adjustment Factors (TLAFs)

The System Operators would be grateful if participants would complete and return this questionnaire. The System Operators will use this feedback in the process of reviewing the options and methodologies for deriving harmonised all-island transmission charges and TLAFs.

Responses should be submitted by **17:00 on Thursday March 19th 2009.**
