### **Extension to the Criteria for approval of Intermediary Applications**

Dear Dana and Jean Pierre,

Viridian Power and Energy (VPE) welcomes this opportunity to comment on the above consultation.

VPE agrees in principle to extending the intermediary role where a generator has registered as a Price Maker Generator unit.

Conditions a) and b) are acceptable – it is reasonable to require access to price support and that a project's MEC is less than 50MW. Condition c) is overly restrictive – i.e. requiring the intermediary to only act on behalf of any other generator in the SEM with which it has a related undertaking or affiliate. We do not see why qualification should be restricted by c) when conditions a) and b) are met.

Yours sincerely
