To whom it may concern,

Trá Investments welcome the opportunity to respond to this consultation on the treatment of Treatment of Curtailment in Tie-Break situations (SEM-12-028).

Trá Investments are a subsidiary of a local Irish owned co-operative and we have 13.3MW of pre-Gate installed wind farm capacity and are actively developing future wind farm projects. We are writing to SEM Committee to support the principals of a grandfathering approach with respect to its positive impacts identified in the SEM-12-028 Consultation paper.

In our view a pro-rata approach would retroactively affect the financial viability of our existing wind farm project. A pro-rata approach will furthermore affect the future investment credibility of our future wind farm projects.

Yours sincerely,

---

John O'Sullivan
