

Process for the Calculation of Outturn Availability

Decision Paper

Addendum

22 December 2015

SEM-15-106

On the 29th September 2015 the SEM Committee published a decision paper (SEM-15-071) on the Process for the Calculation of Outturn Availability. A clarification has been requested regarding the applicable start date of the new arrangements.

The new provisions will take effect from 1st January 2016 in line with the new outage year.

To the extent that the respective Grid Codes in RoI and NI are not modified in time, the arrangements will be deemed commercially effective from this date, regardless of the date that the Grid Code modifications are actually finalised.

The new provisions shall not be applied to any period prior to 1st January 2016.
