

SINGLE ELECTRICITY MARKET COMMITTEE

**Round 19 of Quarterly Directed Contracts
Q4 2022 to Q3 2023**

Information Paper

15th June 2022

SEM-22-029

Table of Contents

1. Introduction	1
2. Directed Contract Quantities	1
3. Directed Contract Pricing	3
4. Subscription Rules	5
5. Directed Contract Round 20.....	6
6. Public/Bank Holidays 2022 and 2023.....	6

1. Introduction

This paper provides information on the quantities and pricing for the upcoming quarterly Directed Contract (DC) subscription round, Round 19, covering the period Q4 2022 to Q3 2023 inclusive. Suppliers will also receive notification from the Regulatory Authorities (RAs) of their updated DC eligibilities for Round 19 by Friday 17th June 2022.

In DC Round 18, market participants were notified of amendments made to the process of calculating DC pricing formulae ([SEM-22-017](#)). Participants were also informed of the RAs decision to hold the Primary Subscription Window over six days. The RAs are implementing such amendments in DC Round 19 and intend to hold a consultation to determine should the amendments be implemented in any subsequent DC Rounds.

2. Directed Contract Quantities

DC subscription windows are typically held every quarter, with DCs allocated on a rolling basis up to five quarters ahead.

The Round 19 DC offerings will be held as follows:

DC Round 19 Primary Subscription Window will be held over six days, across two consecutive weeks:

- Tuesday 21st June until Thursday 23rd June 2022 inclusive; and
- Tuesday 28th June until Thursday 30th June 2022 inclusive.

The associated DC Round 19 Supplemental Subscription Window will be held on:

- Thursday 7th July 2022.

DCs in the Round 19 will be offered in quarterly segments for the periods Q4 2022, Q1 2023, Q2 2023 and Q3 2023.

There are three DC products in the market: Baseload, Mid-Merit and Peak. Suppliers can elect to subscribe for any given product for which they are eligible in any particular quarter from ESB. The definitions of the products are set out in the ESB PG DC Subscription Rules.

These are as follows:

- *Baseload Product*: For Trading Periods at the Contract Quantity arising in all hours.
- *Mid-merit Product*: For Trading Periods at the Contract Quantity during the hours beginning at 07:00 and ending at 23:00 on Business Days and for Trading Periods on days that are not Business Days at 80% of the Contract Quantity.
- *Peak Product*: For Trading Periods arising during the hours beginning at 17:00 and ending at 21:00 on all days during October, November, December, January, February and March at the Contract Quantity.

The RAs used the Herfindahl Hirschman Index (HHI) to set DC quantities and continue to use a target HHI level of 1,150 for the period Q4 2022 to Q3 2023.

The DC quantities to be offered by ESB for Q4 2022 to Q3 2023 in Round 19 are set out in Table 1 below.

Quarter	Baseload	Mid-Merit	Peak
Q4 2022	0	0	57
Q1 2023	0	18	160
Q2 2023	0	124	n/a
Q3 2023	0	96	n/a

Table 1: ESB DCs for Q4 2022 to Q3 2023 in forthcoming Round 19 Subscription (MW)

The cumulative (all rounds) percentage of DC quantities offered by ESB to date for Q4 2022 to Q3 2023 (including these Round 19 quantities) are also shown in Table 2 below.

Quarter	Baseload	Mid-Merit	Peak
Q4 2022	100%	100%	-
Q1 2023	75%	75%	N/A
Q2 2023	50%	50%	N/A
Q3 2023	25%	25%	-

Table 2: Percentage of DCs offered to date (incl. this Round 19 subscription)¹

As outlined in [SEM-21-085](#), the SEM Committee has decided that the amendment to the methodology of calculating DC allocations that took place during DC Round 16 will be implemented in subsequent rounds thereafter (pending a review of the market

¹ Note that the exact percentages shown in this table will vary depending on outturn DC volumes in future subscription rounds.

power and liquidity workstream). As per [SEM-21-065](#), the RAs will re-allocate DCs from market participants who cannot participate in the DC round (as a result of not executing a Financial Energy Master Agreement (FEMA) with ESBPG) to suppliers with a Maximum Import Capacity (MIC) value less than 5% of the total market MIC.

Per section 3.2.13 of the November 2017 decision paper ([SEM-17-081](#)), the SEM Committee has changed part of the Market Concentration methodology, such that a fixed fraction will be solely used in the first round that a product is offered. In subsequent rounds, up to the penultimate round, previous volumes sold are deducted from the annual total determined by the Market Concentration Model in that round; then the balance is multiplied by the remaining fixed fraction. In the final round, all the previous volumes sold are deducted from the annual total determined. There is no fixed fraction in the final round for which a product is on offer. A further clarification to this procedure was outlined in [SEM-19-030a](#) whereby in the event that a product was oversold in the first three rounds, the oversold volume will be deducted from downstream products.

If the volumes in the previous rounds for a particular product add up to more than the annual total volume determined by the Market Concentration Model in the last round, then the volumes for that product are set to zero.

3. Directed Contract Pricing

The prices of DCs are determined by regression formulae that express the DC CfD Fixed Price in a given quarter and for a given product (Baseload, Mid-merit or Peak) as a function of forward fuel and carbon prices. Section 3 of [SEM-22-017](#) outlined amendments made to the process of calculating DC pricing formulae in DC Round 18. Such amendments are also implemented in the modelling process for DC Round 19. Following the completion of DC Round 19, the RAs intend to hold a consultation to determine if the amendments should become enduring in subsequent DC rounds.

The pricing formulae are updated every quarter in line with the established rolling approach to DCs as per [SEM-12-026](#) and [SEM-17-081](#).

The CfD Strike Price for each transaction will be set using the published formulae and associated forward fuel prices, as set out in the Subscription Rules [SEM-18-036d](#).

The DC seller, ESB, will apply the approved published fuel and carbon indices to the regression formulae each day throughout the subscription window and notify suppliers who have elected to subscribe for DC products on that day of the calculated CfD Fixed Price. ESB contracts will be priced in euro.

It should be noted that if, between the publication date of the pricing formulae and a time at which it is applied during the subscription period, forward fuel or carbon markets move to a point outside the range of values for which there is sufficient confidence in the pricing formulae, the RAs reserve the right to suspend subscription and rerun the econometric pricing model or otherwise to amend the determination of the DC CfD Fixed Prices to correct any mispricing. The rerun would use the prevailing forward fuel and carbon prices as inputs. In this case, the resulting formulae would replace the original formulae and to establish CfD Fixed Prices thereafter. The formulae may also be rerun if there is significant change to plant availability. The subscription window would reopen once the formulae are revised.

The DC regression formulae for the forthcoming round will take the following form:

$$\text{CfD Fixed Price}_{q,p} = \alpha_{q,p} + \beta_{q,p} * \text{Gas}_q + \delta_{q,p} * \text{Coal}_q + \epsilon_{q,p} * \text{CO2}_q$$

where:

CfD Fixed Price_{q,p} = DC Fixed Price (in €/MWh) for the relevant quarter (q) and product (p), i.e., Baseload, Mid-merit and Peak.

α_{q,p} = formula constant, which may vary by quarter (q) and product (p).

β_{q,p}, **δ**_{q,p}, and **ε**_{q,p} = formula coefficients, which may vary by quarter (q) and product (p).

Gas_q = the price (in pence sterling per therm) for quarterly Intercontinental Exchange Natural Gas Futures for the relevant quarter. As stated in [SEM-21-005](#), the RAs notified industry of updates to the calculation of quarterly “ICE UK Natural Gas Futures – NBP” ÷ (GBP/EURO Exchange Rate).

Coal_q = the price (in US dollars per tonne) for quarterly ARA Coal Futures. As noted in [SEM-21-005](#), the RAs noted updates to the calculation of quarterly “Rotterdam Coal Futures – ARA” ÷ (USD/EURO Exchange Rate).

CO2_q = the settle price (in Euro per tonne of Carbon Dioxide) for the December month Intercontinental Exchange ECX EUA Carbon futures as reported as “ICE ECX EUA Futures – EUX – (monthly)” for the given calendar year. The December price for a given year will apply to all quarters falling within that year. As noted in

[SEM-21-005](#), the commodity data provider, ICE, transitioned from a public to a fee-based subscription for access to Carbon data.

The values of the constants and the independent variable coefficients are set out in the following table.

Coefficients					
Multiply Gas coefficient by euro/therm Gas price, Coal coefficient by euro/tonne Coal price, and CO ₂ coefficient by euro/tonne CO ₂ price.					
Contract (p)	Quarter (q)	Constant ($\alpha_{q,p}$)	Gas ($\beta_{q,p}$)	Coal ($\delta_{q,p}$)	CO ₂ ($\epsilon_{q,p}$)
Baseload	Q4 22	18.69	59.621	0.0254	0.4320
Midmerit 1	Q4 22	24.57	65.733	0.0197	0.4496
Peak	Q4 22	45.91	74.648	0.0233	0.5050
Baseload	Q1 23	19.87	62.485	0.0233	0.4319
Midmerit 1	Q1 23	27.05	67.968	0.0182	0.4403
Peak	Q1 23	51.06	75.791	0.0217	0.4903
Baseload	Q2 23	20.37	65.965	0.0113	0.4305
Midmerit 1	Q2 23	26.05	69.777	0.0115	0.4491
Baseload	Q3 23	16.48	64.644	0.0132	0.4208
Midmerit 1	Q3 23	21.86	68.255	0.0145	0.4566

4. Subscription Rules

The Subscription Rules ([SEM-18-036d](#)) for the DCs have been made evergreen. To allow this, two items which require updating will be included in the Information Paper published by the RAs prior to each quarterly DC Round. These are the details of the matrix of ESTSEM p,q prices for the purpose of credit cover calculations and Bank Holidays.

Prices for Credit Cover calculations

The matrix of ESTSEM p,q prices for the purpose of credit cover calculations based on closing fuel and carbon prices from 26th May 2022 are as follows²:

	ESTSEM p,q		
	Baseload per MWh	Mid-Merit per MWh	Peak per MWh
Q4 2022	225.98	248.85	300.36
Q1 2023	238.93	261.12	312.33
Q2 2023	196.90	212.14	n/a
Q3 2023	184.30	200.25	n/a

5. Directed Contract Round 20

Per [SEM-21-076](#), the Primary Subscription Window of Directed Contract Round 20 is scheduled to take place from 20th – 22nd September 2022. The associated Supplemental Subscription Window is scheduled to take place on Thursday 29th of September 2022. The RAs intend to hold a consultation to determine if a six-day Primary Subscription Window should be implemented as an enduring arrangement.

6. Public/Bank Holidays 2022 and 2023

The following dates are those known at the time of execution to be bank and public holidays (in the Republic of Ireland and Northern Ireland) between 1st January 2022 and 31st December 2023:

03 January 2022
17 March 2022
18 March 2022

² The RAs note that the prices calculated are based on the most recently validated SEM PLEXOS Model. Due to the unprecedented increase in volatilities of commodity prices in recent months, and in order to reflect the current market developments, the RAs are using a more recent date in Round 19 compared to previous DC rounds (excluding DC Round 18), in these extenuating circumstances.
