1. INTRODUCTION

1.1. Background and Purpose

This Agreed Procedure supplements the rules in relation to Participant registration administered by the System Operators, set out in the Capacity Market Code (hereinafter referred to as the “Code”). It sets out procedures with which Parties to the Code must comply.

1.2. Scope of Agreed Procedure

This Agreed Procedure sets out the procedural steps for:

(a) registration of a Party for accession to the Capacity Market;
(b) registration of a Candidate Unit and Capacity Market Unit for participation in the Capacity Market; and
(c) registration of a Supplier Unit.

This Agreed Procedure forms an annex to, and is governed by the Code. It sets out procedures to be followed, subject to the rights and obligations of Parties under the Code. In the event of any conflict between a Party’s obligations set out in the Code and this Agreed Procedure, the Code shall take precedence.

It is not intended that there be any inconsistency or conflict between section 2 “Overview” and section 3 “Procedural Steps”. However, in the event of any inconsistency or conflict, section 3 “Procedural Steps” shall take precedence.

In section 3 “Procedural Steps” a corresponding process flow diagram is included for each procedural steps table. Process flow diagrams are for illustrative purposes. It is not intended that there be any inconsistency or conflict between any procedural steps table and process flow diagram however, in the event of any inconsistency or conflict, a procedural steps table shall take precedence.

1.3. Definitions

Words and expressions defined in the Code shall, unless the context otherwise requires or unless otherwise defined herein at Appendix 1 “Definitions”, have the same meanings when used in this Agreed Procedure. In the event of any conflict between a Party’s obligations set out in the Code and this Agreed Procedure, the Code shall take precedence.

References to particular paragraphs relate internally to this Agreed Procedure unless otherwise specified.

1.4. Compliance with Agreed Procedure

Compliance with this Agreed Procedure is required under the terms as set out in the Code.
2. **OVERVIEW**

The registration process consists of two steps:

(a) **Party registration (for accession to the market):** registration as a Party to the Code; and

(b) **Unit registration (prior to Qualification for a Capacity Auction):** a Party becomes a Participant by registering Unit(s).

In relation to a Generator Unit or Supplier Unit, the Participant under the Code must be the same Party that is, or will be, the Party registered in respect of that Unit under Section B.7 of the Trading and Settlement Code.

In relation to an Interconnector, the Participant under the Code must be the same Party that is, or will be, the Party registered in respect of that Interconnector under Section B.10 of the Trading and Settlement Code.

2.1. **Party Registration**

The procedure for registration as a Party is set out at section 3.1 below.

All Parties that accede to the Capacity Market Framework Agreement become a Party to the Code in accordance with and subject to the accession process outlined in section B of the Code.

To register as a Party, an Applicant shall:

(a) complete the Application Form available from the System Operators' website;

(b) comply with eligibility requirements set out in section B.5 of the Code and in the Application Form; and

(c) pay the Accession Fee.

(d) have already registered or intends to register as a Party to the Trading and Settlement Code.

2.2. **Participant and Unit Registration**

As set out in section B.5.2 of the Code, in order for a Party to participate in any of the arrangements under the Capacity Market Code, a Party shall register or provisionally register a Generator Unit or Interconnector as a Candidate Unit. A Candidate Unit may be:

(a) a Generator Unit or Interconnector that a Party proposes to register under the Trading and Settlement Code; or

(b) a Generator Unit or Interconnector that is registered under the Trading and Settlement Code.
Upon registering its first Unit, a Party shall become a Participant in the jurisdiction where the Unit is located and shall be issued with a unique Participant ID. Note that a Party may already have a Participant ID if it has previously registered a Generator Unit or Interconnector under the Trading and Settlement Code.

A Participant ID is a unique identifier for Units aggregated for the purposes set out under the Code and Trading and Settlement Code.

2.2.1. Candidate Unit Registration

The procedure in relation to registration of a Candidate Unit is set out at section 3.2 below. In order to register a Candidate Unit, as set out above, the Party shall submit the following to the System Operators for validation:

(a) a Participation Notice and Form of Authority (as required);
(b) Capacity Registration Pack;
(c) Participation Fee; and
(d) Remit Notification Form (optional).

Upon registration the Generator Unit or the Interconnector shall be issued with a unique Unit ID and shall be considered a Candidate Unit or a provisionally registered Candidate Unit.

In the event that a Party is registering a proposed Generator Unit or proposed Interconnector, the Candidate Unit shall remain provisionally registered until such time that the Unit is registered under the Trading and Settlement Code or is Qualified for a Capacity Auction. A Party that has provisionally registered a Candidate Unit may cancel the registration by informing the System Operators.

A Candidate Unit is eligible to take part in the Qualification Process for a Capacity Auction. Once Qualified, a Candidate Unit shall become associated with a Capacity Market Unit under this Code.

2.2.2. Combining Candidate Units into Capacity Market Units

A Participant may combine Candidate Units into a Capacity Market Unit. Therefore, subject to the eligibility criteria set out in section E.7.7 of the Code, a Candidate Unit may have a many-to-one relationship with a Capacity Market Unit.

The Applicant shall specify in the Participation Notice if the registering Candidate Unit shall seek to be Qualified in the Capacity Auction as a standalone Capacity Market Unit; or shall seek to aggregate its capacity as part of a Capacity Aggregation Unit. A Capacity Aggregation Unit is a type of Capacity Market Unit, created during the registration process where a Capacity Market Unit has a one-to-many relationship with Candidate Units, as shown in the figure below.

<table>

</tr>
<tr>
<td>GU_402xxx</td>
<td>GU_402xxx</td>
<td>CAU_422xxx</td>
</tr>
</tbody>
</table>
All other Candidate Units not listed under Section E.7.7 of the Code, shall have a one-to-one relationship with a Capacity Market Unit.

2.2.3. Registration of a Unit under a different Participant

A Party may seek to register and become the Participant with respect to a Candidate Unit (and any associated Capacity Market Unit) that is already registered by a different Participant. The registration shall be subject to the successful Deregistration of the Unit by the existing Participant under both this Code and the Trading and Settlement Code. The new Party shall become the Participant for the Unit under the Code and the Trading and Settlement Code from the intended date of Deregistration.

To complete the registration the Party shall follow the Unit registration process outlined in 3.2 of this Agreed Procedure. In addition, the Party shall assume responsibility for any Awarded Capacity in respect of the Capacity Market Unit and shall be required to meet the Deregistration Applicant’s obligations, outlined in section B.5.6 of the Code.

2.2.4. Registration of Capacity Increases

If a Participant intends to commission an increase in capacity as a new Generator Unit pursuant to the criteria set out in the Trading and Settlement Code, then the applicant shall follow the Candidate Unit registration process, set out in section 3.2 of this Agreed Procedure.

If the Participant intends to commission the increase in capacity of an existing Generator Unit in a Capacity Auction, Agreed Procedure 3 “Qualification and Auction Process” shall apply.

2.2.5. Supplier Unit Registration

A Party that registers a Supplier Unit under the Trading and Settlement Code is deemed to have registered that Supplier Unit under the Capacity Market Code. The Applicant registering the Supplier Unit shall be required to register as a Party under the Capacity Market Code. The Supplier Unit shall become effective under the Capacity Market Code on the agreed effective date in accordance with Agreed Procedure 1 “Registration” of the Trading and Settlement Code. Supplier Units do not participate in the Capacity Auctions.
2.3. Registration of User Access Rights for Participants

This section sets out the Access Roles and Rights of Users following an Applicant’s registration of a Party and subsequent registration of its first Unit to a Participant.

2.3.1. Appointing a Data Processing Entity

A Party, other than the System Operators, may appoint a Data Processing Entity to submit Data Transactions.

If a Party appoints a Data Processing Entity they shall notify the System Operators by submitting the following information:

(a) Party name;
(b) name of person authorised to notify System Operators of a Data Processing Entity;
(c) name of Data Processing Entity; and
(d) tasks that can be carried out by the Data Processing Entity.

The System Operators shall acknowledge the submission within two Working Days of its receipt. The Party may then treat the Data Processing Entity as a User restricted to the tasks that the Party has permitted it to undertake.

The obtaining of access and permissions for the Data Processing Entity is equivalent to that of other Users, in accordance with Agreed Procedure 4 “Communication Channel Qualification”.

Note: this section shall be updated once details are confirmed as part of the system detailed design.

2.3.2. User Access

There are three main types of User represented in the Capacity Market Interface:

(a) Main Participant User: This User shall be able to update the access permissions of other Users of the Capacity Market Interface.

(b) Reporting Access User (Read): Users assigned reporting access shall have read access to the Capacity Market Interface and shall be able to view and download reports, such as Capacity Auction results.

(c) Trading Access User (Write): Users assigned trading access shall have write access to the Capacity Market Interface and shall be able to submit Capacity Auction Offers on behalf of a Capacity Market Unit registered to their Party. They shall also have the same privileges assigned to a Reporting Access User.

2.4. Nominating an Intermediary

The Intermediary shall follow the procedure for registering as a Party and registering Units under the Code and this Agreed Procedure. [Note: requirements for Intermediaries being considered by the Regulatory Authorities]
2.5. Deregistration

In accordance with section B.5.6 of the Code a Party or Deregistration Applicant may apply at any time to Deregister any Capacity Market Unit registered in its name. The procedure for Deregistration is set out at section 3.4 below. The Deregistration procedure is applicable when:

(a) a Participant seeks to voluntarily Deregister any Units it has registered; or
(b) the System Operators determine that any of a Party’s Capacity Market Units should be Terminated as set out the Code and Agreed Procedure 2 “Default and Suspension”.

The application to voluntarily Deregister a Capacity Market Unit shall be reviewed pursuant to Section B.5.6 of the Code.

Note that Candidate Units and Supplier Units cease to be registered under the Code once they cease to be registered under the Trading and Settlement Code. There is no additional process for Deregistration required to be completed under this Agreed Procedure or the Code.
