1. INTRODUCTION

1.1. Background and Purpose

This Agreed Procedure supplements the rules set out in the Trading and Settlement Code (hereinafter referred to as the “Code”) in relation to the requirement of the Market Operator to make certain information available to Participants and the general public. It sets out procedures with which Parties to the Code must comply.

1.2. Scope of Agreed Procedure

This Agreed Procedure relates to Data Reporting (accessed via the Balancing Market Interface) and Data Publication (via the Market Operator website). It sets out the following procedures in relation to Data Reporting and Data Publication:

(a) the data required to be published and reported by the Market Operator and the method by which the Market Operator shall make such data available;
(b) arrangements for notifying the intended recipients of the reports and publications;
(c) access to the reports and publications; and
(d) the timing of reporting or publication and their update arrangements.

The scope of this Agreed Procedure is set out in Appendix E “Data Publication” of the Code. This Agreed Procedure forms an annex to, and is governed by, the Code. It sets out procedures to be followed subject to Parties’ rights and obligations under the Code.

In the event of any conflict between a Party’s obligations set out in the Code and this Agreed Procedure, the Code shall take precedence.

1.3. Definitions

Save as expressly defined in this Agreed Procedure, words and expressions defined in the Code shall have the same meanings when used in this Agreed Procedure.

References to particular sections relate internally to this Agreed Procedure unless specifically noted.

1.4. Compliance with Agreed Procedure

Parties to the Code are required under the terms of the Code to comply with this Agreed Procedure.
2. PROCEDURES

The reports and publications required in accordance with the Code are set out in Appendix E “Data Publication” of the Code and Appendix 2 “Report Listing” of this Agreed Procedure.

2.1. Market Data Classifications

In this Agreed Procedure, Market Data is categorised according to the applicable timeline, which will be one of:

- Updated periodically as required
- Updated annually and as required
- Updated monthly
- Updated daily, prior to the Trading Day
- Updated within the Trading Day (which may be one or more instances within the Trading Day)
- Updated hourly or half hourly prior to the Imbalance Settlement Period (ISP)
- Updated following each Gate Closure 1
- Updated following each Imbalance Pricing Period (IPP) or Imbalance Settlement Period (ISP)
- Updated daily post Trading Day or Settlement Day
- Updated on a Capacity Period basis post end of Capacity Period
- Ad-hoc Reports

2.2. Public Data and Private Data

Market Data will be categorised as either:

(a) **Private Data Reports**: individual reports generated for individual Participants only (“Member Private”) or all of them (“Member Public”). These reports shall be made available by the Market Operator via the Balancing Market Interface on the basis that access to such reports shall only be available to the relevant recipients in accordance with the access rules detailed in Agreed Procedure 5 “Data Storage and IT Security”.

(b) **Public Data Publications**: will include market information, market prices and volumes, forecasted data, and current system data that are to be made available by the Market Operator to the general public via the Market Operator website. Access to such publications shall not be conditional upon the relevant user possessing a Digital Certificate. In addition, the Market Operator shall provide Participants with access to a subset of these publications through the Balancing Market Interface, in accordance with the access rules detailed in Agreed Procedure 5 “Data Storage and IT Security”.

(c) **Market Private Data**: data restricted to the Market Operator staff only in accordance with the access rules detailed in Agreed Procedure 5 “Data Storage and IT Security”.

(d) **REMIT Data**: data restricted to the European Agency for the Cooperation of Energy Regulators and relevant Participants.
Some elements of Market Data shall first be subject to Data Reporting (and shall for this purpose be Private Data), and shall subsequently be required to be published by the Market Operator (and shall upon such become Public Data).

Confidential Information is Member Private information. If it is made available through a report, it will only be made available through Private Data Reports for a single Participant.

The Market Operator shall not be obliged to publish any material that it reasonably believes may be of an obscene or libellous nature.

2.3. Data Publication

The reports and publications required in accordance with the Code are set out in Appendix E “Data Publication” of the Code and Appendix 2 “Report Listing” of this Agreed Procedure.

The Data Publication process set out in this Agreed Procedure will be the procedure by which the Market Operator discharges its obligations under the Code to make certain information available to the general public. The Market Operator shall provide such information through the Market Operator website as set out in this Agreed Procedure.

Data Publications consist of such market information, market prices and volumes, forecasted data, and current system data that are required by the Code to be made available by the Market Operator to the general public.

2.3.1. Elements of Data Publication

Data Publication covers the publication by the Market Operator of the following items:

(a) **Items and Data Record publication**: The Market Operator shall publish any data that the Code requires it to publish in a timely manner after it has been received by the Market Operator or calculated by the Market Operator in accordance with the timings specified in the report listing in Appendix E “Data Publication” of the Code, or elsewhere in the Code.

(b) **Code Publication**: The Code sets out the rules and procedures that govern the operation of the Single Electricity Market. The Market Operator shall publish the latest version of the Code, and shall update this published version, in accordance with the timelines as set out in the Code.

2.3.2. Publication Timelines and Format of Publications

Data Publications may be published on periodically within the Trading Day, daily, weekly, monthly, annually, or on an ad-hoc basis, in accordance with the timelines set out in Appendix E “Data Publication” of the Code and Appendix 2 “Report Listing” of this Agreed Procedure. All data shall be published in one of the following formats: PDF, CSV, XLS, XML, or HTML (depending on the nature of the publication).

2.3.3. Notification

The Market Operator shall provide access to Data Publications through the Market Operator website and, where required, may also provide such data as Data Reports through the Balancing Market Interface. In the case of Data Publications via the Market Operator
website, the Market Operator shall not require that such access is conditional upon the relevant user possessing a Digital Certificate.

2.3.4. Viewing and Access

The viewing of Data Publications online shall be carried out by selecting the appropriate menu item on the Market Operator website.

2.3.5. Publication Updates

In cases where data that is required by the Code to be published by the Market Operator has been recalculated by the Market Operator or re-submitted to the Market Operator after being updated, improved, or corrected, the Market Operator must publish the updates in a timely manner as soon as reasonably practicable or as otherwise required by the Code.

2.4. Data Reporting

The reports and publications required in accordance with the Code are set out in Appendix 2 “Report Listing” of this Agreed Procedure.

The Data Reporting process set out in this Agreed Procedure will be the procedure by which the Market Operator discharges its obligations under the Code to make certain information available to a specific Participant. The Market Operator shall provide such information through the Balancing Market Interface, as set out in this Agreed Procedure.

2.4.1. Elements of Data Reporting

Data Reporting covers the making available, by the Market Operator to certain Participants only (or all of them), data reports as set out in Appendix 2 “Report Listing”. Data Reporting is the term given to the provision of reports that contain data that is available to a specific Participant (or all of them) and is confidential to that Participant (or all of them). Data Reports include market reports or settlement reports.

2.4.2. Availability

Daily and weekly Data Reports will be available through the Balancing Market Interface for up to a month following their initial posting by the Market Operator. Monthly and annual reports will be available through this channel for up to two years following their initial posting by the Market Operator. For Participants requiring older data this will be available to download from the Market Operator website.

Participants may submit a request for a specific Data Report through the Balancing Market Interface, via Type 2 Channel and/or Type 3 Channels.

2.4.3. Updates

Where Data Reports are updated by the Market Operator, the time at which the updated Data Report was created will form part of the timestamp of the message displayed in the Market Messages window. If an event is rerun in order to recreate a Data Report, the original report will be overwritten. Each time a Data Report is created or recreated, a message will
shall be sent to the Balancing Market Interface to inform the Participants that the Data Report is available.

2.4.4. Scheduled and Requested Reports

Scheduled Data Reports are published in accordance with the timelines described set out in Appendix 2 “Report Listing”. Requested reports, if not available through any of the Balancing Market Interfaces or Market Operator Website, shall be responded to by the Market Operator as soon as practicable.

2.4.5. Notification

For the purpose of Data Reporting, the Market Operator shall make data available to a specific Participant for download from the Balancing Market Interface, and shall notify the relevant Participant that such data is available for download as appropriate. Access to such reports shall only be available to Participants in accordance with the access rules detailed in Agreed Procedure 5 “Data Storage and IT Security”.

2.4.6. Viewing and Access

All connections are initiated externally to the SEM systems i.e. by Participants, Meter Data Providers etc. and operate in a synchronous request-response mode. In relation to Type 2 Channel, the Market Participant user connects to the Balancing Market Interface and is authorised by selecting the appropriate Digital Certificate (Agreed Procedure 3 “Communication Channel Qualification” sets out the process by which Party Users gain access to obtaining a Digital Certificate) and entering a valid password for the authorised user.

The technology behind the Balancing Market Interface and Meter Data Interface is Java based. All data submitted by Participants to the Balancing Market Interface using Type 3 Channel is required to be in XML format.

The Type 2 Channel is screen based, to provide a human-to-computer interface. These requests are processed by the same web service as is used for the Type 3 Channel. Type 3 Channel communications use web services to provide an automated, computer-to-computer interface.

In certain cases, the Type 2 Channel (screens) may have additional configuration to appropriately present the information returned by the web service. Some additional information is available via the Type 2 Channel that is not available on Type 3 Channel.

2.4.7. Security

Agreed Procedure 3 “Communication Channel Qualification” and Agreed Procedure 5 “Data Storage and IT Security” detail the security and access requirements of the Market Operator’s Isolated Market System.
### APPENDIX 1: DEFINITIONS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Balancing Market Interface</td>
<td>means the function within the Market Operator’s systems that interfaces to the Type 2 Channel and Type 3 Channel communications as required under the Code.</td>
</tr>
<tr>
<td>Data Publication</td>
<td>means the provision of the most relevant and recent information to the general public through the Market Operator website and also, where appropriate, making a subset of the same information available to Participants only through the Balancing Market Interface.</td>
</tr>
<tr>
<td>Data Reporting</td>
<td>means the process used by the Market Operator to report data to certain Participants only (or all of them).</td>
</tr>
<tr>
<td>Digital Certificate</td>
<td>means an electronic credential issued and digitally signed by a Certificate Authority. The international standard upon which most commercial certificates are based is the ITU-T X.509 certificate. The digital certificate represents the certification of an individual, business, or organizational public key.</td>
</tr>
<tr>
<td>Market Data</td>
<td>means the information relating to the operation of the Single Electricity Market and which the Market Operator is required to publish, or make available to one or more Participants, pursuant to the Code and this Agreed Procedure.</td>
</tr>
<tr>
<td>Market Private Data</td>
<td>means the class of Market Data that is only accessible by Market Operator staff.</td>
</tr>
<tr>
<td>Member Private</td>
<td>means the class of Market Data for which reports are generated for Individual Participants only and made available by the Market Operator via the Balancing Market Interface.</td>
</tr>
<tr>
<td>Member Public</td>
<td>means the class of Market Data for which individual reports are generated for all Participants and made available by the Market Operator via the Balancing Market Interface.</td>
</tr>
<tr>
<td>Private Data</td>
<td>means reports generated for individual Participants only (“Member Private”) or all of them (“Member Public”) and made available.</td>
</tr>
<tr>
<td><strong>Public Data</strong></td>
<td>means market information, market prices and volumes, forecasted data, and any other system data required by the Code to be published by the Market Operator targeted for the general public.</td>
</tr>
</tbody>
</table>

Comment [A1]: Note: Updated definition to include relevant defined terms (meaning has not changed).
APPENDIX 2: REPORT LISTING

LEGENDS
Please use the following legends when interpreting the subsequent report listing.

| $\phi$    | (Lowercase Phi) Imbalance Pricing Period. |
| $\Omega$  | (Capital Omega) Capacity Market Unit. |
DATA PUBLICATIONS

The following list identifies each Data Publication that is published to the general public via the Market Operator website and whether it is also reported to Participants via the Balancing Market Interface. When a report of the same name as set out in Appendix E is updated, and the information contained within those reports is generated by Market Operators Isolated Market System, the previously Published report of the same name will be overwritten by the new Publication.

Comment [A2]: Note: This section has been deleted as it is a repetition of Appendix E “Data Publication” of the Code which takes precedence. The table in this appendix did contain additional columns compared to Appendix E. In this regard please note:
- ‘Classification’ column not needed in Appendix E because each publication is assigned to a table with the relevant periodicity
- ‘Available via BMI’, ‘Confidentiality’ and ‘Validity’ columns will be available via the Technical Specifications
